

X TendaSealSM Services

The Seal Solution

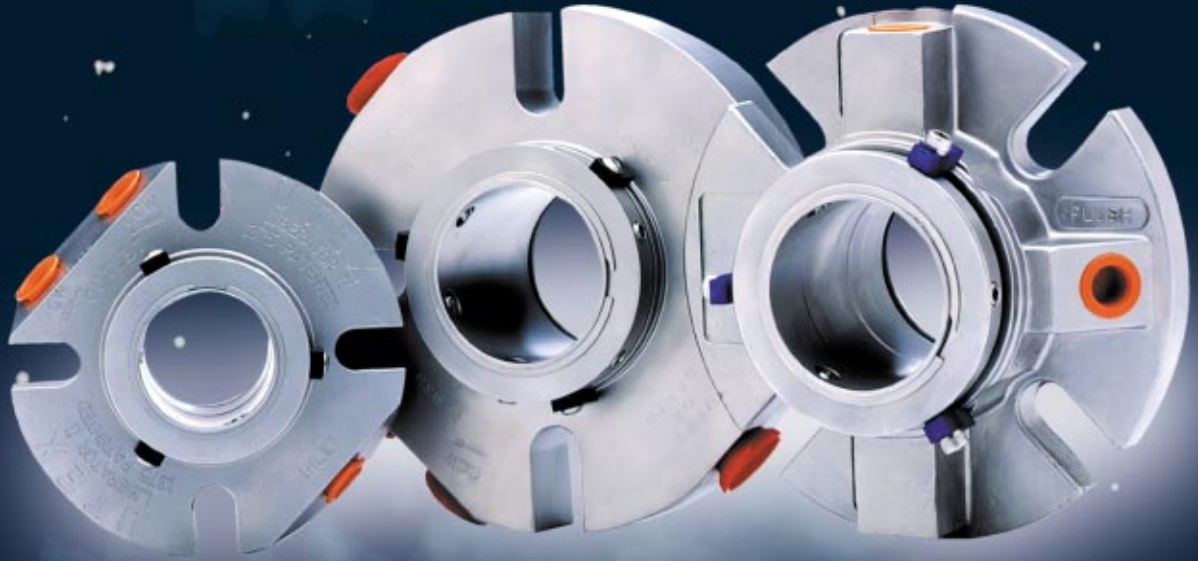

X-TendaSeal Services gives new life to a seal that is no longer performing in the field. X-TendaSeal's quality control process produces a mechanical seal that is both precision tested and reliable.

When you depend on seals, you can depend on X-TendaSeal. Our experienced, skilled technicians use only premium materials and operate within a strict set of procedures. Plus, we maintain an extensive library of manufacturers' specifications. The end result is a high quality product that meets or exceeds the specifications of the original manufacturer.

After the initial cleaning and evaluation, a seal is rebuilt and tested at each step of the X-TendaSeal procedure.

X-TendaSeal Services

Quality Mechanical Seal Repair & Replacement

- ◆ Repairs and replicates virtually all major mechanical seal types & related components
- ◆ Repaired seals meet or exceed OEM standards
- ◆ Convenience of shipping to one location
- ◆ Seals receive individual attention
- ◆ Repair kits available for field repair
- ◆ Special engineered services available

X-TendaSeal Services

X-TendaSeal gives you exactly what you are looking for in a seal repair service...Quality, Flexibility, Quick Response and Technical Assistance

Longer Service Life For Mechanical Seals

X-TendaSeal will extend the life of any type of mechanical seal, no matter who originally manufactured it, by repairing, remanufacturing, or replicating any parts that have failed. The seal will meet or exceed the original specifications after X-TendaSeal service.

Fast Economical Repair Service

X-TendaSeal service is economical and fast. After a worn seal is evaluated by our technicians, customers are given a quote on the repairs necessary to bring the seal back to spec. Repairing a mechanical seal is normally a fraction of the cost of buying a new seal. Normal turn-around time is two weeks, but special handling can be accommodated in emergencies.

Identification & Documentation

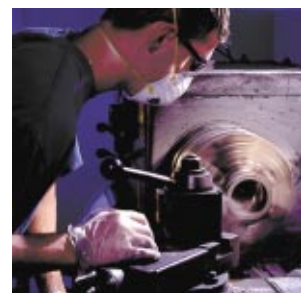

Preliminary Cleaning

Inspection & Evaluation

Repair & Component Replacement

Quality Repair & Inspection

If at any point a repaired seal component fails the quality inspection, it is sent back to the previous repair station and the process is repeated. If the component cannot meet the specification, it is replaced. This quality assurance program is continued throughout the X-TendaSeal process.

Complete Inventory

The X-TendaSeal service provides the convenience of shipping to one location. This saves time on seal repair and replacement. Part of the X-TendaSeal service is maintaining an inventory of mechanical seals and components that can readily replace or repair a failed seal.

Repaired / New Component Inspection

Clean & Final Visual Inspection

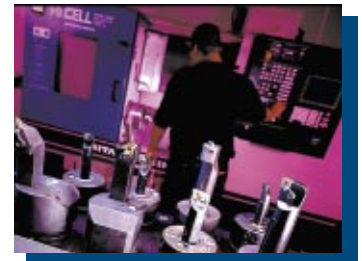

Built-in Flexibility & Engineered Custom Services

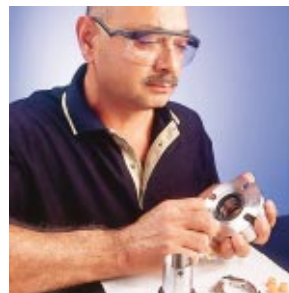

As a division of UTEX Industries, Inc., a diversified seal manufacturer, X-TendaSeal gives you more flexibility and choices to meet today's complex sealing demands. With X-TendaSeal, you can select the option for your specific application...new manufacture, repair, remanufacture, or specialized services. Our specialized services include conversion of packed pumps for mechanical seal use and custom engineered cartridge design.
